

60 mm Ultralight Commando Mortar ANTOS

ANTOS mortar is an extremely light weapon designed for paratroops and special units. Most parts are made of aluminium alloys and plastic materials. The firing mechanism is trigger type with fixed striker. The handgrip with trigger allows easy carrying and firing in oval and flat trajectories. The liquid sight shows directly the range for both charges. Modular design enables production of various configurations.

TACTICAL-TECHNICAL DATA	
Calibre	60.7 mm
Weapon length	905 mm
Barrel length	650 mm
Total weight	4.9 – 5.3 kg acc. to configuration
Weight of weapon incl. storage package and accessories	19 kg
Elevation	(45 ÷ 85)°
Minimum range (+ 21°C, 85°, primary charge 0)	80 m
Maximum range (+ 21°C, 45°, full charge 1)	1 200 m
Maximum operating pressure in the barrel	18 MPa
Range of operating temperature	(-30 ÷ +60) °C
Firing mode	gravity
	trigger on the handgrip

double-sides mode firing selector double-sides cocking lever

LIQUID SIGHT

Liquid level against the scale shows directly the range of fire for primary and full charge of the 60 mm mortar bombs delivered with the ANTOS mortar. Sight scale is divided; half of the scale for each charge with marked ranges of fire for the applied charge without need to use standard range tables.
